

Rich Dreams provides a secure environment for individuals to showcase their success journey, build connections, and pursue their dreams. Our cloud-based platform, accessible via mobile apps and website, supports multimedia formats for sharing achievements, including videos, photos, posts, blogs, and music.

Security is our top priority at Rich Dreams. We continuously implement robust security features across our products and services to ensure the safety of our users and protect them from potential harm while using our platform.

This white paper aims to outline the security features and functions available on Rich Dreams. It assumes that readers are familiar with the platform's functionalities related to media sharing, messaging, and networking. Unless otherwise stated, the security measures discussed in this paper apply across all Rich Dreams platforms, including K-12 Education, Higher Education, Businesses and Government.

Infrastructure

Our cloud-based platform is built with security in mind and leverages Amazon Web Services (AWS) for hosting, database management, and storage. AWS's data centers and services adhere to stringent physical and operational security standards, with regular audits conducted to maintain infrastructure security. This partnership ensures that Rich Dreams can effectively safeguard the security of its users and their data.

Firewall Compatibility

Rich Dreams prioritizes the security and privacy of its users by implementing HTTPS connections to the Rich Dreams server during sessions. This authentication process ensures the integrity of data exchange and safeguards user privacy. Additionally, SSL technology is utilized to maintain a secure internet connection and protect sensitive information.

Application Security Capabilities

To further enhance security, Rich Dreams offers various application security capabilities for all signed-in users:

Filtering: Rich Dreams employs filtering mechanisms to prevent objectionable content from being posted on the platform, ensuring a safe environment for users.

Reporting: Users have the ability to report offensive content, and Rich Dreams promptly addresses and responds to their concerns.

Blocking: Users can block abusive individuals and notify the platform administrators of specific user behavior, maintaining a positive and respectful community atmosphere.

Security Tips

To help users maintain account security, Rich Dreams recommends the following tips:

Guard your password: Create a unique and strong password for your Rich Dreams account and avoid sharing it with others.

Verify Website URL: Before logging in, ensure that the website URL is www.richdreams.co to avoid phishing attempts by scammers who may create fake websites.

Log Out of Shared Devices: Always log out of your Rich Dreams account when using shared devices to prevent unauthorized access.

Exercise Caution with New Connections: Be cautious when connecting with new individuals on the platform and promptly block and report any suspicious or unsafe behavior.

Remove Malicious Software: Regularly scan for and remove any suspicious applications or browser add-ons from your devices to prevent malware attacks.

Avoid Suspicious Links: Refrain from clicking on suspicious links, even if they appear to be from trusted connections. Report any suspicious links to Rich Dreams to help maintain a secure environment for all users.

Authentication

Rich Dreams offers multiple authentication methods for user convenience and security. Users can choose to log in using a password or Single Sign-On (SSO) with OAuth. For added security, Two-Factor Authentication (2FA) is available, providing an extra layer of protection for those using a username and password.

SSO simplifies access by allowing users to use one set of login credentials across multiple applications. Rich Dreams is compatible with various third-party enterprise identity management solutions.

Additionally, Rich Dreams offers seamless OAuth provisioning with Facebook and Google, enabling instant access for users.

Your organization can further enhance security by associating its domain with Rich Dreams. Once approved, all existing and new users with your email domain will have access to the platform, ensuring a safe and secure environment for collaboration.

Moderator Controls

Enhanced security features empower account moderators on the Rich Dreams platform with comprehensive control and oversight:

Users page: Account moderators can efficiently manage all registered users, with the ability to delete, approve, or enable/disable accounts as needed.

Member Profile Page: Exclusive access allows moderators to individually manage user accounts, including deletion, approval, or enabling/disabling, ensuring precise control over user activity.

Members Information Display: The Users Page provides detailed user information, such as username, displayed name, email, sign-up IP, login IP, signup date, and message count, aiding moderators in comprehensive user management.

Member Search: Advanced search functionality enables moderators to filter users based on various criteria, including signup date, creation IP, last login IP, enhancing user management efficiency.

Moderator Notes & Messages: Moderators can communicate directly with users through messaging and maintain notes for individual users, facilitating effective communication and record-keeping.

Login as Member: Account moderators can access user accounts to review messages or investigate issues directly, with the option to enable or disable this feature for added control and security.

Users Page: Efficiently manage new user registrations with the Users Page, allowing moderators to perform various actions such as approval, disapproval, and enabling/disabling accounts.

Reports Page: Stay informed about reported accounts with the Reports Page, where moderators can review reported accounts and take appropriate actions, including dismissal if necessary.

Logs Page: Track all moderator and super admin activities related to approving, disapproving, or deleting members on the website, ensuring precise activity monitoring.

Messages Activity Page: Monitor messaging activity by individual members on the website with the Messages Activity Page, providing moderators with insights into member interactions.

Enable Emails on new Signup: Opt to receive email notifications whenever new members sign up on the website, offering moderators real-time updates on user registrations.

Labels for Approve / Disapprove: Clearly distinguish approved and disapproved members with visible labels on the user's page, enhancing clarity and organization in user management tasks.

Privacy

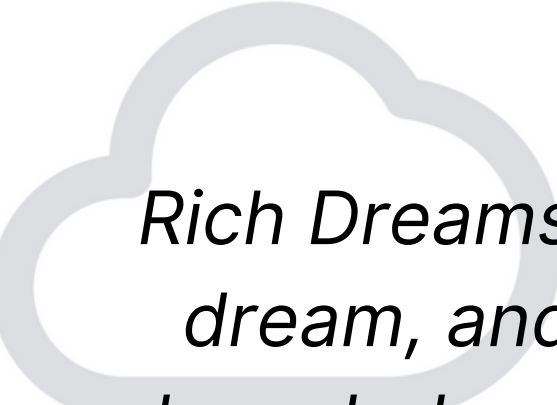

Rich Dreams prioritize user privacy above all else. Here's why you can trust us with your data:

No Data Selling: Regardless of whether you're using Rich Dreams for Personal, Education, Corporation, Government, or Healthcare purposes, we never sell your data.

Customizable Privacy Settings: Tailor your privacy preferences to suit your needs with our configurable privacy settings, giving you control over your account's privacy.

Ad-Free Data Use: Rest assured, we do not utilize any data collected from your use of our services, including our suite offerings, for advertising purposes. However, data obtained during visits to our marketing websites, such as richdreams.co, may be utilized. You retain control over your cookie settings when browsing our marketing websites.

For more detailed information regarding our privacy practices, please refer to our comprehensive Privacy Statement and K-12/Primary and Secondary Schools Privacy Statement at <https://richdreams.co/privacy-policy> and <https://richdreams.co/k-12-privacy-policy>.

Rich Dreams is for those who dare to dream, and all those who have the knowledge, generosity, and heart to support others in reaching their dreams.

- DUKU FORÈ GAICD

Rich Dreams serves higher education, k-12 education, businesses, and government services as a platform for showcasing success journeys. Our priority is ensuring a safe and secure environment tailored to the specific needs of each clientele type.
